MIRNOVA Academic Tutorship Consortium

The Contemporary Classical Course

Leading Ahead into New Worlds and New Eras

We provide an extraordinary one-of-its-kind service to students, families, teachers and schools, totally unique and distinct from any other educational programs offered directly or via internet.

Individual and Group Tutorship through Customized and Personally Guided Projects

- Sciences
- Technologies
- Engineering
- S.T.E.A.M.
- Arts
- Mathematics

We Match Tutors with Students

- Subject Matter Expertise (academic and practical)
- Language
- Culture
- Personality
- Psychology

Your child and your students are unique and have special capabilities, interests, talents, personalities.

The right Tutor and the right Project is what will enable and empower your child and your students:

- Academically
- Socially
- Creatively
We provide mature and proven Experience and Training

- Critical Analytical Thinking
- Practical Applied Designing
- Skillful Focused Communicating

We do this by practicing what we and every tutor, mentor and guide on our Team has learned from our combined lifetimes of education and work in corporate, academic, and governmental sectors internationally.

We do advanced and remedial tutoring. We focus upon the student’s capabilities, potentials, interests, disinterests, and opportunities. We use all methods of creative learning and teaching, and this includes special activities - Projects that are designed and tailored to your child, your student, for deepening and enhancing their learning and their powers for advancement and success in any future education, career, and lifestyle.

We address ALL the challenges and difficulties of learning, including situations that seem impossible due to various circumstances and conditions. So, there are no barriers to discussing what can be done. This includes situations with different physical and psychological disabilities and impairments.

The Projects are each tailored to be interesting, instructive, and practical for both academic and future career purposes. Projects have generally from 2 to 5 students working together along with one or more tutors. Individual 1:1 tutoring and projects are possible and sometimes appropriate.

We are based in Russia and our Program is International, Worldwide, Global. It is “G8” and it is “G20.”

Our base is in Moscow with affiliations internationally. Our students and tutors and their projects are in:

- Russia
- Korea
- China
- Germany
- Norway
- Sweden
- Finland
- Denmark
- France
- Switzerland
- United Kingdom
- USA
- Canada

We work closely and in partnership with the Educational Community and Leadership
• Schools and Universities
• Education Companies providing both remedial and advanced tutoring and special-curriculum courses
• Ministries and Departments of Education, Science and Culture at municipal, regional and federal levels
• Privately-held and publicly-owned companies who want:
  o specialized training for their employees
  o mentorship and teaching experience for their employees
  o corporate social responsibility projects that will generate worthwhile and sustainable results for the communities they serve

All of the persons who serve as tutors and mentors have recognized, verified, and proven credentials, experience and excellent personal character.

Each person in the Consortium goes through an extensive process of review, due-diligence, vetting and peer-review. Each person has minimally the following credentials and accomplishments:

• Baccalaureate degree (but usually it is a Master’s or Doctoral (PhD) degree
• Native-speaker with high quality in either English or Russian
• Proficiency in English and Russian and generally one or more other languages
• Experience in both academic and business worlds of employment
• Commitment to the Vision and Mission of MIRNOVA’s Programs
• Commitment to the Students and their Families and Schools
